FROZEN DRINK MACHINE

DO NOT ADD ICE !!!

TO BEGIN

Pour mix ($\frac{1}{2}$ gal.) and 2 gallons of cold water into the bowl. Repeat for second bowl. If using alcohol, substitute $\frac{1}{2}$ gallon alcohol for $\frac{1}{2}$ gallon of water. You may use more or less alcohol depending on taste, just be sure to decrease water to equal alcohol added.

DO NOT FILL BOWL PAST MAX FILL LINE

Normal time to freeze is approx $1\frac{1}{2}$ hours. Freezing time will vary somewhat depending on ambient conditions. Also, freezing time may be decreased by adding the alcohol after the mix freezes.

TO KEEP MACHINE FULL OF FROZEN MIX

Combine water, mix, and alcohol in a large container (a 5 gal. Bucket works) and refrigerate. Add refrigerated mix to machine when level is halfway between min. and max to keep machine full of frozen product.

TO CLEAN

TO EMPTY BOWL: Turn off power. Drain product. Fill bowl with WARM water. Let stand for 15 minutes, then drain again.

PLEASE DO NOT DISASSEMBLE MACHINE

IF FURTHER ASSISTANCE IS REQUIRED, PLEASE CALL US AT 815-467-0173
